

huy tran

[cover letter]

hello!

my name is huy tran. i'm a penetration tester, ict & network engineer, and a problem solver with extensive experience in digital forensics and threat intelligence. i've been exposed to cybersecurity concepts and practical applications since 2024. i earned my certified penetration tester specialist in august 2025 after one year of preparation, which included 5 days of intense hacking on real network infrastructure and writing a 130+ page report.

i love working with new concepts and dealing with challenges. this cover letter is being written in typst, i learnt about this just 3 days prior. i combine my knowledge from different fields to come up with solutions. i learn by doing and taking notes—my obsidian notes have grown to over 200 files, creating what i call a digital garden. i'm proud to say that my growth mindset would be a valuable asset for your company.

besides my personal projects, i actively give back to the community. i help raise privacy & security awareness among people around me and translate low-tech magazine to make it accessible to more people in my hometown.

my digital garden and linkedin, which showcases all my work, studies, and projects, is included in my résumé. i look forward to talking with you.

best,

A handwritten signature in black ink, consisting of a stylized 'H' followed by a long horizontal stroke.
